

**The Hustler Chainless Advantage**

Our innovative Chainless feeders are designed to provide many years of faithful service. From the outset we aimed to give farmers low maintenance, the ability to handle virtually any bale, and farmer friendly bale loading systems.

Not just innovation for innovation's sake: Hustler's chainless models have proved their worth by becoming New Zealand's most popular bale feeders.

Hustler's Chainless Balefeeder range has many common features: the same feed unit is matched to different bale loading systems to suit the needs of any operation, big or small.

These are the features that have made it New Zealand's most popular range of feeders:

**1: SIMPLE AND SAFE DESIGN**

The innovative Chainless design eliminates troublesome feed chains, meaning fewer moving parts. The result is very low maintenance plus simple and safe operation.

**2: ROUND AND SQUARE**

The only true square and round balefeeder range found on the New Zealand market today, the Chainless range allows you to feed out virtually any bale you have on hand.

**3: THE FEED SAVER**

Our Chainless feeders use your feed efficiently; you can infinitely vary the amount of feed flowing over the side by adjusting the feed platform height from the cab.

**4: NO HASSLE ROTORS**

Designed to tease the bale out rather than simply unroll it, our rotors are self-cleaning, eliminating feed wrapping.

**5: LONG LIFE FEEDBED**

We specify a polyethylene feedbed because it's slippery, non-corroding and extremely durable.

Single bale feeder
Handles a huge variety of bales
Infinite variation in feed control
Self-loading: no front-end loader required
High latch point for rigidity and strength
One tyne is longer than the other for easy locating
Slotted top link for ease of inserting forks into feeder
Heavy-duty transmission
Free flow wiper panel
High tensile tynes
CAT 1 & CAT 2 top and bottom pins

**The Chainless 2000 Balefeeder**

The Chainless 2000 Balefeeder is a compact, single bale feeder that attaches to the tractor by the 3 point linkage, suitable for small to medium farms.

Like all our Chainless models, the 2000 has no feed chains and handles virtually all types and conditions of square and round bales using the same teasing feed out action.

**SELF LOADING**

The 2000 is self-loading. First the feeding cradle is disconnected by the pull of a rope. The tractor backs up and picks up the bale, then moves to the platform.

The operator can then stop to remove the net wrap before placing the bale on the platform. Our very low cradle with no crossbar makes bale loading easy and quick.

The operator then drives the forks into the feed unit (easy to line up correctly because of their unequal length tynes) and is now ready to feed out. This simple, quick loading operation helps to minimise the job.

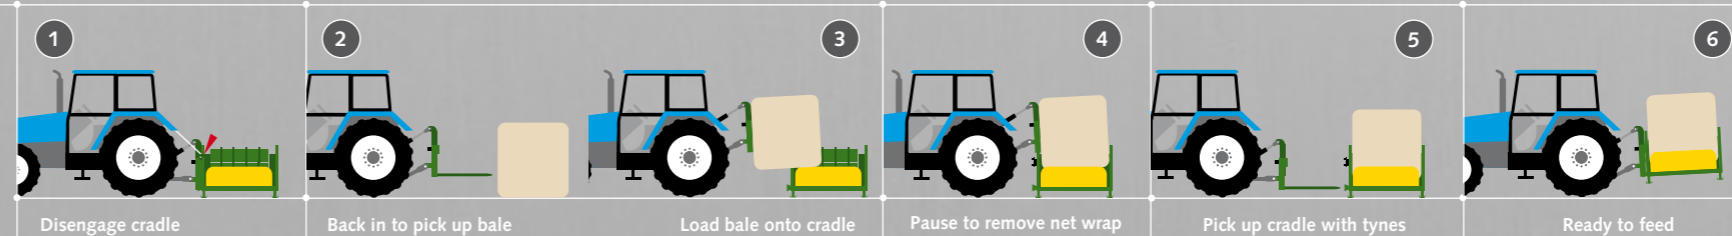

**CHAINLESS 2000 SPECIFICATIONS**

BALE SIZES ROUND: 4' X 4' - 6' X 4'
BALE SIZES SQUARE: all sizes up to 8' long
BALE WEIGHT: up to 1000kg
UNIT WEIGHT: 490kg
HYDRAULICS REQUIRED: 2 X double-acting, 12-60 litres/min, 2250-3000 psi

**OPTIONAL EXTRAS:**

- String box
- Hydraulic top link
- Hillside restraint kit
- Extension kit for square bales over 6'6"
- Manual diverter valve and hydraulic touchfeed kit for tractors with only one set of double-acting remotes
