

# Chainless 8000™

## Square and Round Balefeeder Wagon

Adjustable side for 8' bales

### WIDE MODEL

The optional wider version shown here will handle 8' square bales. The standard model will feed round or square bales up to 6'6".

- Carries 4 bales round or square
- Proven Chainless feed system
- Robust construction, minimal moving parts
- Handles a huge variety of bales
- Can feed most types of pit silage - holds 5.0m<sup>3</sup>
- Feeder unit auto-separates bales while feeding
- Optional wide model for large square bales up to 8' long
- Only 2 sets of double-acting hydraulics required to operate 4 functions

### The Chainless 8000 Balefeeder

Designed for larger operations, our Chainless 8000 model will carry four bales ready to feed. The 8000 will also feed out most types of silage.

### LOADING THE 8000

The Chainless 8000 is loaded from the back with a front-end loader, but can also be loaded from the side of the machine.

The operator drops the jack and stabiliser foot, unhitches the tractor and uses his front-end loader to place the bales or silage on the platform and push them up. As they are fed out, bales or silage are moved up the slippery polyethylene floor with the hydraulic cylinder operated tailboard, controlled from the cab of the tractor.

When ready to feed out, the feeding unit automatically separates the bales by 200mm and the bale platform raises.

Tandem oscillating wheels are standard equipment for extra stability.

Hydraulic cylinder operated tailboard

Tandem oscillating axles

Slippery, non-corroding feedbed

Excellent side reach for trough feeding

Drop-down heavy-duty jack

Drop-down stabiliser foot makes loading easy

Extra heavy-duty drawbar and towing eye

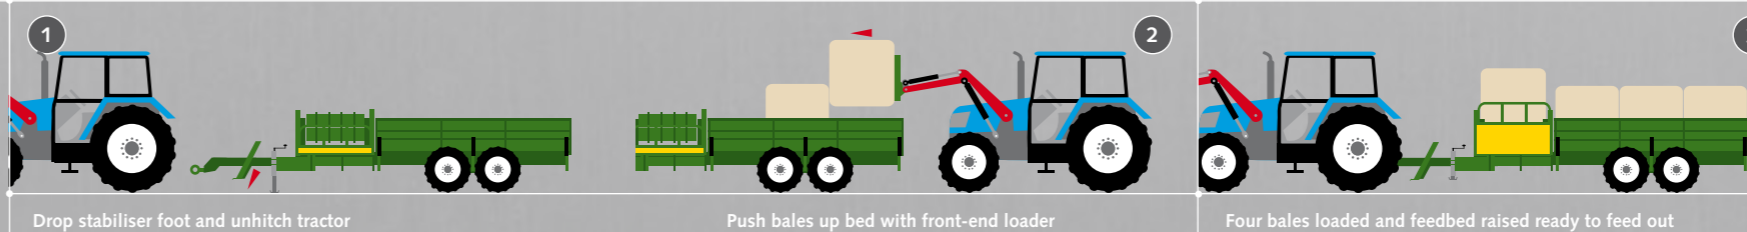

### CHAINLESS 8000 SPECS
