- Anti hose burst valve for extra safety
- Refer to page 29 for more VMX mast features
- 1200kg lift capacity

- High strength mast rails
- Heavy-duty chain
- Low-maintenance design mast - no greasing required
- Excellent visibility

VMX Toolcarrier Vineyard

Hustler's versatile Toolcarrier can quickly mount virtually any implement used on a vineyard: post-hole borers, leaf pluckers, net winders – the list goes on.

Toolcarrier makes it safe and easy for one person to attach implements. No more hammers, spanners, crowbars or frustration and no more vine trimmers dangerously swinging from a block and tackle in the shed.

ULTRA QUICK ATTACHMENT

Simply drive in to the implement sitting on the ground and attach the hydraulic hoses to the 3rd service if required.

You've got hydraulic height adjustment on the move, and the added advantage of a handy set of forks for general lifting around the vineyard.
